BRIEF

I am seeking a competitive and challenging environment where I can contribute to your company and establish an enjoyable career for myself. My job objective is PHP web developer and/or iOS developer.

EXPERIENCE

PHP Web developer

Dec.2015 ~ Now

Harvest Digital Planning Pty Ltd

Harvest Digital Planning is an urban planning and design company. I'm currently working as web developer focusing in urban planning web projects development base on a company customized CMS calling HIVE, which is developed on the top of Concrete5.

Web developer and network administrator

July.2013 ~ Dec.2015

Pacific Group Tour Pty Ltd

Pacific Group Tour® is a Melbourne local travelling company. I worked as web developer and network administrator focusing in company business e-commercialization against previous traditional travelling business by developing websites with e-commerce features and CRM and B2B functionalities

Lecturer

March.2015 ~ Now

Navigation International Pty. Ltd

Navigation International Pty. Ltd (also known as Linghang Education) is a professional training institution in major cities all over Australia. I do a part-time job as a lecture in its Melbourne branch. I'm currently teaching three course: "PHP Web Programming", "iOS Development with SWIFT" and "Java Programming Foundation".

Lab Demonstrator

July.2012 ~ December.2013

University of Melbourne

I worked as a lab demonstrator for Embedded System Design (ELEN90066) during my research study in University of Melbourne. This course is about electronic circuit design and embedded software development. The objective of the workshops is to make a Gameboy from design the circuit, soldering PCB, game programming using C language to finally demonstrating a completed game console. My job is mastering all these wide range knowledge, demonstrating workshop experiments in every step and helping students going through their projects.

Wind Service Assistant (Internship)

GE (China) Co., Ltd

May.2009 ~ August.2009

I worked as an intern in GE Beijing Wind Service department. My work includes: data tracking such as Engine Downtime Update, Retrofit Project Update; wind Service parts inventory control and tracking; debrief maintenance service of wind turbines, and know details about maintenance service, as well as office administrative support to China Service Manager.

WORKS

UNSW Event Planner (planner.unsw.edu.au)

My latest work. I designed it for UNSW to help new students in university knowing about orientation activities and meeting friends. The whole site use responsive designed to achieve all platform compatibility. An admin panel page with bundle excel sheet uploading, event editing, and analysis functions is developed. This website is employed only during orientation week.

Stonelea Country Estate (stonelea.com.au)

Design for a country resort located in Victoria remote area. A simple client relationship management system is developed in this website including membership management and newsletter pushing functions.

BusOnline (busonline.com.au)

Bus rental website. Mainly focus on the bus order system (with routing and cost calculation) and bus management system (including driver and bus assigning, invoicing, CRM, etc.) development.

OZtrails Melbourne (oztrailsmel.com.au)

I designed it for a Melbourne local day tour travelling company. The main idea is to build a day tour group deal website with customer community.

Meetisan (meetisan.com)

I designed it for a Sydney new founded company. It is only a single webpage. I'm focusing the IOS version APP developing and still under construction.

JG Accountants (jgaccountants.com.au)

I designed it for a Melbourne local accounting firm. I develop this website under Wordpress CMS and write some JavaScript diagrams to illustrate their service vision.

EDUCATION

RMIT

2013

Master of Technology (IT & Web design)

Completed courses covered SQL and advance HTML as well as some popular programming language (e.g. JavaScript, PHP, XHTML).

University of Melbourne

2011-2013

Master of Philosophy (Electronic Engineering)

Focus on security protocols developing (based on NesC) in TinyOS system, which is a specifically designed operation system for wireless sensor network.

University of Melbourne
Master of Telecommunications

2010

Nankai University (China)
2005-2009

Bachelor of Electronic Information Science and Technology

TOP10 university in China.
